(TR) TRKE

NEMLİ BİLGİLENDİRME

Aşağıda paylaşılan kullanım mrleri, cihazınızın teknik spesifikasyonları doęrultusunda, standart operasyonel veriler baz alınarak hesaplanmış ortalama srelerdir.

Bu sreler; kullanım yoęunluęu, tercih edilen boya/kimyasal tr, alıřma ortamındaki evresel faktrler ve periyodik bakımların dzenli yapılıp yapılmadıęı gibi deęiřkenlere baęlı olarak farklılık gsterebilir.

Cihazınızın operasyonel srdrlebilirlięini saęlamak, ařınma oranlarını minimize etmek ve garanti kapsamındaki haklarınızı korumak adına, yalnızca retici onaylı orijinal sarf ve yedek paraların kullanılması kritik nem tařımaktadır. Orijinal olmayan rn kullanımı veya bakım periyotlarının aksatılması durumunda, belirtilen mrlerin kısalabileceęi ve cihaz performansının olumsuz etkilenebileceęi ve cihazınızın garanti dıřı kalabileceęi nemle hatırlatılır.

IMPORTANT INFORMATION

The service lives shared below are average periods calculated based on standard operational data in accordance with the technical specifications of your device.

These periods may vary depending on variables such as intensity of use, type of paint/chemical preferred, environmental factors in the working area, and whether periodic maintenance is performed regularly.

To ensure the operational sustainability of your device, minimize wear rates, and protect your rights under warranty, it is of critical importance to use only manufacturer-approved original consumables and spare parts. It is strongly reminded that the use of non-original products or neglect of maintenance periods may shorten the specified lifespans, adversely affect device performance, and void your device's warranty.

INFORMATION IMPORTANTE

Les durées de vie indiquées ci-dessous sont des durées moyennes calculées sur la base de données opérationnelles standard, conformément aux spécifications techniques de votre appareil.

Ces durées peuvent varier en fonction de variables telles que l'intensité d'utilisation, le type de peinture/produit chimique choisi, les facteurs environnementaux du lieu de travail et la régularité des entretiens périodiques.

Afin d'assurer la pérennité opérationnelle de votre appareil, de minimiser les taux d'usure et de protéger vos droits à la garantie, il est essentiel d'utiliser exclusivement des consommables et des pièces de rechange d'origine approuvés par le fabricant. Nous vous rappelons que l'utilisation de produits non originaux ou le non-respect des fréquences d'entretien peut réduire les durées de vie mentionnées, nuire aux performances de l'appareil et entraîner l'annulation de la garantie.

DE DEUTSCH

WICHTIGE INFORMATION

Die unten angegebenen Lebensdauern sind Durchschnittswerte, die auf der Grundlage von Standard-Betriebsdaten gemäß den technischen Spezifikationen Ihres Geräts berechnet wurden.

Diese Zeiträume können je nach Variablen wie Nutzungsintensität, gewählter Farb-/Chemikalienart, Umweltfaktoren am Arbeitsplatz und der Regelmäßigkeit der periodischen Wartung variieren.

Um die Betriebsnachhaltigkeit Ihres Geräts zu gewährleisten, Verschleißraten zu minimieren und Ihre Garantieansprüche zu wahren, ist es von entscheidender Bedeutung, ausschließlich vom Hersteller zugelassene Original-Verbrauchsmaterialien und Ersatzteile zu verwenden. Wir weisen ausdrücklich darauf hin, dass die Verwendung von Nicht-Originalprodukten oder die Vernachlässigung von Wartungsintervallen die angegebenen Lebensdauern verkürzen, die Geräteleistung beeinträchtigen und zum Erlöschen der Garantie führen kann.

RU РУССКИЙ

ВАЖНАЯ ИНФОРМАЦИЯ

Указанные ниже сроки службы являются средними значениями, рассчитанными на основе стандартных эксплуатационных данных в соответствии с техническими характеристиками вашего устройства.

Эти сроки могут варьироваться в зависимости от таких переменных, как интенсивность использования, тип используемой краски/химикатов, факторы окружающей среды в рабочей зоне и регулярность проведения периодического технического обслуживания.

Для обеспечения эксплуатационной устойчивости вашего устройства, минимизации степени износа и защиты ваших прав по гарантии критически важно использовать только одобренные производителем оригинальные расходные материалы и запасные части. Напоминаем, что использование неоригинальной продукции или несоблюдение графиков технического обслуживания может привести к сокращению указанного срока службы, негативно повлиять на производительность устройства и лишить вас права на гарантийное обслуживание.

IT ITALIANO

INFORMAZIONE IMPORTANTE

Le durate di vita sopra riportate sono periodi medi calcolati sulla base di dati operativi standard, in conformità con le specifiche tecniche del dispositivo.

Tali periodi possono variare a seconda di variabili quali l'intensità d'uso, il tipo di vernice/agente chimico preferito, i fattori ambientali nell'area di lavoro e la regolarità delle manutenzioni periodiche.

Al fine di garantire la sostenibilità operativa del dispositivo, minimizzare i tassi di usura e proteggere i diritti previsti dalla garanzia, è di fondamentale importanza utilizzare esclusivamente materiali di consumo e pezzi di ricambio originali approvati dal produttore. Si ricorda espressamente che l'uso di prodotti non originali o la trascuratezza dei periodi di manutenzione possono accorciare le durate indicate, influire negativamente sulle prestazioni del dispositivo e comportare la decadenza della garanzia.
